Cover For  
PowerVent 3000

24-HOUR  
SOLAR POWERED  
VENTILATION

The PowerVent 3000 is Nicro's most powerful and full-featured vent available. The advanced solar powered design enables this deluxe model to move 900 cubic feet of air per hour. Operation is round-the-clock, 24 hours a day. A full shut-off damper prevents water intrusion in rough seas, and an On/Off switch stops operation while maintaining the battery charging process. The PowerVent 3000 is available in white, black, or stainless steel. An optional stainless steel cover is also available. Mounts directly to deck or hatch.

- Solar cells recharge Ni-Cad battery for 24-hour operation
- Full shut-off from below prevents water intrusion in rough seas
- Whisper-quiet fan operation
- Interchangeable exhaust and intake fan blades included
- High capacity battery operates vent for 48 hours without sunlight on a full charge
- High Impact ABS construction
- No wiring required; built-in On/Off switch
- 2-year limited warranty and 5-year qualified warranty
- Mounting hardware, interior trim ring and insect screens included
- 4" vent fits 4-3/4" diameter hole
- Dimensions: 8-7/8" X 8-7/8" X 2-3/8" high
- Replaceable Ni-Cad battery

**All PowerVent 3000 models come complete with two fan blades, white plastic interior trim ring, insect screens, mounting hardware and an easy-to-understand installation manual.**
